The Darkened Home .- BY MINNIE MAY. Affectionately inscribed to my only Sister.

Dear Sister, scarce a year has passed, since thou wert by my side-

In all thy blushing joyousness, a fair and happy With laughing eyes and sunny curls; methinks I see

A bridal wreath of orange buds, twined lightly round thy brow.

And only fragrant bright hued flowers, were floating on its stream. For then we had our Mother dear,-her sweet and loving smile, Which from our earliest childhood's hour, could

tears and woes beguile. Her gentle voice, whose every tone still thrills upon Her step,-'t was music in our home; without her all was drear.

Ah, those were bright and happy days! Hope's flowers were in their blo And little did we think such flowers but blossom

vase which held the brightest bude, is shattered now in twain,-And we are left with sadden'd hearts, to mourn its loss in vain.

Our household chain is riven; -three links are here; -two joined above. But we are only closer drawn, -- so few we have to We only know the blessings lost, the joys now past

Since the light of home departed, and we are all Until that sad and dreary day, when Death with ruth-

its gems? home of youth, our happy home, is shrouded now in gloom; --Father and Mother, where are they? Goask the silent tomb.

Yet though their earthly forms of clay are laid away to sleep, In spirit they are hovering near, -- Love's vigils still

when temptations gather round,- our footsteps almost stray, They, like the lone bright beacon star, guide on the upward way.

Oft times I'm weak, and would recall them, from their blest abode; But then the thought comes o'er my heart, "i' is the will of GoD; if we put our trust in HIM, we all shall meet And

A Pacific Railroad .- Amid the discord of rival political parties, (says an exchange, the name of which we are unable to give,) the business and commercial interests of the country must not be forgotten. There are great and important principles to be contended for in the science and practice of Government; but there are equally important facts, the truth of which no one can deny, that demand constant attention. The one now most prominently before us, and that especially concerns the people of the West, is a Pacific Railroad, We say a Pa cific Railroad, not because we believe that we shall finally have but one of those great | To the Editor of the Shelby News: peace-makers, wealth-makers, and inland ned by a single route of travel.

1st: Route of the 47th and 49th Parallels, from surveys under Gov. Stevens in 1853-4-5. This survey commences at St. Paula, Minnesota, and ends at Vancouver riously estimated at from \$105,076,000 to \$135,766,000.

2nd: Route of the 41st and 42d Parallels. from surveys of Lieut. Beckwith in 1852, and Capt. Stansbury in 1849. This route fornia, 2,024 miles, at an estimated cost of \$116.095,000.

3rd: Route of the 38th and 39th Parallels. from surveys under Capt. Gunnison and Lieut Beckwith.

This route commences at Westport, Missouri, and terminates at San Francisco. The distance in a straight line is only 1500 miles; but the geographical difficulties in the way, are said to be so great that the actual number of miles to be traversed would not be less than 3,000, and the expense of construction renders it impracticable.

4th: Route near the 35th Parallel, surveyed by Lieut. Whipple, in 1853. This Route commences at Fort Smith, Arkansas, and is supposed to terminate at

San Francisco, and the length is set down at 2,174 miles, although the equated distances (increased length, on account of ascending and descending grades) is estimated at 963 miles, and the cost is estimated at \$169,-210.265.

Bank of Ashland .- We are informed, the books for subscription to the branch of the Bank of Ashland will be open, at the Court House on County Court day in May. It will be necessary for all who wish to see this Bank established here to come prepared on that day to subscribe for the stock. The mother Bank, with \$400,000, taken in three hours, and amid inquiries for more, will go into operation on the first of August next; and, as a matter of county pride, aside from the necessity for a Bank here, the amount required should be fully taken on next court in every department.

Our county has almost become a hissing reproach, and a by-word of scorn, for want of public spirit. Do not endorse the accusation, by letting this measure fall through,-the last opportunity for a Bank that will ever be offered to us. It is mortifying to us, to have thus to make the appeal. The Commissioners deem further etfort useless, if not carried out on that day. Current bank notes will be taken as payment,-the commissioners having made arrangements for the silver and gold.

To be Continued .- There is no question, that, the anti-American factions-the Black mined to keep up, until after the Presiden- Jeans tial election, the Kansas and slavery excitements. If Kansas were this day to apply, legally qualified, for admission into the Union, those factions would prevent its accomplishment. They have bound her down on the wheels of Agitation, and will not permit her to be freed, until after November next. As Lewis D. Campbell said, "the igger business" is the life blood of many who are now figuring largely before the country. Remove from the arena, Agitation about Kansas and Slavery, and those Agitators--Seward, Chase, Greeley, Blair. Douglas, Pierce, Banks, Richardson, and thousands like them, would at once sink into oblivion, or if remembered at all, only as fit objects for scorn, contumely and contempt.

Changes.

Whom first we love, you know, we seldom wed,
Time rules us all. And life, indeed, is not
The thing we planned it out, ere hope was dead
And then, we women cannot choose our lot. Much must be borne which it is hard to bear;

Much given away which it were sweet to keep. God help us all! who need, indeed. His care, And yet, I know, the shepherd loves his sheep.

My little boy begins to babble now,
Upon my knee his earliest infant prayers.
He has his father's eager eyes, I know,
And, they say too, his mother's sanny hair. But when he sleeps and smiles upon my knee.
And I can feel his light breath come and go,
I think of one (Heaven help and pity me!)
Who loved me and whem I loved long ago.

Who might have been " " sh, what I dare not think! We are all changed. God judges for us be God helps us do our duty, and not shrink, And truet in Heaven humbly for the rest.

WHICH TO CHOOSE.

Mrs. Champion, a rich widow of only fortune.

Suiter No. 2, was a young man about town, very fashionable, polite and pleasant. He contrived to keep out of debt, but his financial resources were said to be very limited. Mr. Claude Careless evidently had a good prospect of success.

The third suitor, Mr. Stanley Moreton, was an art student, and also cultivated poetry. He was engaged in self-admiration when a light step recalled him to a sense of propriety. He turned and beheld the widow, but a thick veil covered her face. He drew a chair to her side and addressed her.

"Dearest Isabella," said he in his most persuasive tones, "allow me to remove the envious screen which shrouds charms that were never meant to be concealed." "Alas, Captain," said the widow, with

a tremutous voice, and drawing her veil yet closer, "those charms exist no longer." "Is it possible!" cried the Captain in a tone of alarm. "What do you mean?"

"But that is not all," said Mrs. Champme all morning. My investments were most unfortunate. I am completely beggared."

THE AGE OF MAN .- But few men die of age. Almost all die of disappointment, passional, mental, or bodily toil, or accident. The passions kill men sometimes, even suddenly. The common expression, choked with passion, has little exaggeration in it; for even though not suddenly fatal, strong passions shorten life. Strong bodied men often die young-weak men live longer than the strong, for the strong use their strength, and the weak have none to use. The latter take care of themselves; the former do not. As it is with the body. so it is with the mind and temper. The strong are apt to break, or like the candle, run; the weak burn out. The inferior animals, which live, in general, temperate lives, have generally their prescribed term on the other ladies in the hall. In reality, of years. The horse lives twenty-five years; the ox fifteen or twenty; the lion about twenty; the dog ten or twelve; the rabbit eight; the guinea pig six to seven. These numbers all bear a similar proportion to the time the animal takes to grow to its full size. But man, of all the animals, is the one that seldom comes up to his average. He ought to live a hundred years, according to this physiological law, for five times twenty are one hundred; but average, four times his growing period; the cat six times; and the rabbit even eight times the standard of the measurement. The reason is obvious-man is not only the most irregular, and the most intemper-A Misconception of Disease .- A Spring- ate, but the most laborious and hard-worked of all animals. EAR AND EYE. RS. LEBRUNN & DUFTON, Oculists and Aurists. Deafness and Ear Diseases radically

DR. LEBRUNN offers to those suffering from Deafness his Infallible Aural Remedies, which have been successful in nearly 3,000 cases of confirmed deafness. These remedies comprise different cour-ses for diseases of the internal, middle and external ses for diseases of the internal, middle and external ear, and have been pronounced by those celebrated aurists, Drs. Cramer, of Serlin, Itard and Delan, of Paris, Curtis, Plitcher and Yearsley, of London, as being the most wonderful and effectual ever applied for diseases of the internal and middle ear. Dr. Leß. warrants a cure in every case where the ear is perfect in formation. He has eighteen certificates of cures from those who had been Deaf end Dumb, and whose hearing is now completely restored and are now enabled to learn the language. The names of 2 200 persons who have been great by Dr. Leß. of 2,700 persons who have been cured by Dr. LeB. may be seen on application. Patients, by sending a

Testinony. — The undersigned, practitioners in medicine in the city of New York, having had frequent occasion to witness the practice of Drs. Lebrum & Dufton, in diseases of the Ear and Eye, laying aside all professional jealousy, freely admit that the course pursued by them in treating diseases that the course pursued by them in treating diseases of these delicate organs, from the unparalleled success attending it, is well worth the attention of our professional brethren throughout the United States, feeling assured, as we do, that Aural Surgery has not met with that atten ion which its importance demands. Their system of treating diseases of the middle and internal Ear, by "Medicated Vapora," particularly in chronic or complicated cases, forms a new era in the practice of Aural Surgery; such cases yielding in almost every instance to this new and yielding in almost every instance to this new and powerful agent. This practice fills up the void which has long been falt by the general practitioner, enabling him to cope successfully with every case where perfect formation exists.

CONSUMPTION SUCCESSFULLY TREATED BY INHALA-TION OF MEDICATED VAPORS, by Jours son Stewart Rose, M. D., Fellow of the Royal Col-lege of Physicians, and for years Senior Physician in the London Infirmary for diseases of the Lungs. In this age of progress, Medical Science has con-tributed her full share to the general welfare, and that which shines resplendent the brightest jewel in her diadom, is

MEDICATED VAPOR INHALATION. he treatment of Consumption and kindred affecevery good principle known in machines of this description, and one which, in point of strength, simplicative, workmanship, materials, and adaptation to Southern wants, we are confident has no equal.

We do not design to compare this with other machines, but will proceed to give you an idea of its general arrangement and advantages:

In the construction of our Machine wrought iron has been substituted, as far as possible, in the place of wood and cast iron.

The disease is not in the Stomach but in the Lungs; common sense then will teach you, that medicine applied in the form of vapor, directly to the diseased surface of the lungs, will be far more effectual than medicines taken into the stomach. The success of The main or driving wheel, as well as the gearing throughout, is larger and more substantial than in any other Resper, and this Machine will run with greater steadiness and freedem over uneven fields.

Buttace of the langs, whi is at more enectant than medicines taken into the stomach. The success of Medicated Vapor Inhalation in the treatment of disease of the Lungs, exceeds my most sanguine expectations—and I earnestly appeal to the intelligence of all afflicted, or who have the germs of the disease greater steadiness and freed in over uneven fields than any other, as well as support itself better on soft ground. It operates also with much less notes than other Reapers, and without any jerking motion, in consequence chiefly of the knife being attached to a wheel instead of a crank.

All parts of the Machine are readily got at, taken out, or adjusted by the operator.

The frame of the Machine is made to move up or down in guide holes or sloats, so as to bring the cutters to any required height cutting from one inch to sixteen inches from the ground, in the most convenient manner.

The cutters for both grain and grass are sickleedge, and require little or no grinding. They can
be taken out or put in in a moment, without passing
them through the arms of the driving wheel, which is
a great convenience, and obvintes a serious objection
to many combined and other Reaping-Machines.
